and

The Canadian Association of Social Workers

Tips and Tricks for Troubleshooting

- Make sure your audio is turned on, if so it will look like this

- The video from the webcam

- will be located here
- You may privately post your questions here and the presenter will answer them during the question and answer period at the end of the presentation.
- If you experience any technical difficulties you can access the help button located at the top of the right page or email Rina Arseneault(rinaa@unb.ca)

Behind the Screen

Preventing & Eliminating Cyberviolence
against Young Women and Girls

Presented by:
Julia Phillips, RSW

ATS
NB

NB
ASW

History of the Project

**Partnering organizations: Office of the Child and Youth Advocate,
Muriel McQueen Fergusson Centre**

Funded in 2014 by Status of Women Canada

**Objective: Help NB communities respond to cyberviolence with
evidence based, coordinated strategies**

**Project study developed by Provincial Youth Advisory Committee
(PAC)**

What is Cyberviolence?

Cyberviolence is...

A range of harmful activities through use of information and communication technologies

Cyberbullying is...

Various forms of online harrassment

Cyberviolence

Existing literature

In 2014, BSW students from Saint Thomas University completed a literature review on Cyberviolence, which highlighted:

The nature and extent of the issue

Impacts of Cyberviolence

Responses to Cyberviolence

LET'S TALK ABOUT

Phase 1

The Study

Focus Groups with young women age 16-19

Provincial wide online survey with youth participants age 16-19

Focus Groups

Question 1: What do you think about when you think about cyberviolence?

Question 2: What are people doing about cyberviolence in your community?

Question 3: What strategies would you like to see in your community?

Question 4: If you experienced cyberviolence, what would you do?

Question 5: What do you do to make sure you don't harm other people online?

Focus Group Discussions

Acts of Cyberviolence

Unique Qualities of Cyberviolence

Social Context of Cyberviolence

Impacts of Cyberviolence

Existing Strategies

1

Lack of existing strategies

2

Awareness campaigns

3

Services and resources

4

rules and consequence pertaining to cyberviolence

Barriers

TO PREVENTING AND ELIMINATING CYBERVIOLENCE

**Lack of
Education and
Awareness**

Social Media and Instant Messaging Among Youth in NB

RULES REGARDING INTERNET USE

- Sharing personal information (25.41%)
- Websites to/to not access (9.24%)
- Time limit to internet use (7.59%)
- Erasing browser history (2.97%)
- Online supervision (2.31%)
- No rules (52.48%)

The Nature and Extent

-
- Of Cyberviolence ●
-

Apps that allow anonymity may have an increased potential for cyberviolence

Those who experience/perpetrate cyberviolence in one form, are likely to be experiencing or perpetrating cyberviolence in another form

Nature and Frequency Of Cyberviolence

Have felt angry because of something that happened to them or someone they know (online or by text)

Have been threatened online or by text

Naked/Sexual/Intimate Images

● Have you been asked to send one? ●

Young Men

■ Yes (27.27%) ■ No (72.73%)

Young Women

■ Yes (57.62%) ■ No (42.38%)

Gender Differences and Cyberviolence

Some participants believed that gender had an impact more than others:

"Boys tend to keep it to themselves and hide their emotions"

"Males are more likely to seek out confrontation and avoid emotions, and less likely to report it. Females are less likely to seek confrontation but will often be very affected by it"

"People who identify as female tend to be more emotional than males due to socialization and societies ideas about gender, so that would affect how a person would deal with it"

Who will

— youth —

Confide in?

Someone who is...

*Trustworthy, kind & caring, familiar,
safe, non-judgemental, and able to help*

• Existing Initiatives •

“Underutilized and not inclusive
[to] all young people”
